Complex Type anre:ContractSignedBySupplier

Namespace	http://www.anre.ro/ANRESchema
Annotations	Instiintare despre contract semnat de furnizor, dupa ce a semnat in prealabil si clientul fie la ghiseu fie prin aplicatia furnizorului. Se emite si cand furnizorul deruleaza procesul de semnare in afara platformei POSF, doar cand contractul a fost semnat semnat de ambele parti.
Diagram	<p>The diagram illustrates the UML class structure for the 'ContractSignedBySupplier' complex type. It shows 'ContractSignedBySupplier' as a base type of 'anre:Message'. Both classes have associated annotations. The annotations for 'ContractSignedBySupplier' describe the process of contract signing by the supplier after it has been signed in advance, or by the client via their application. The annotations for 'anre:Message' describe the general message structure, including fields like authorID, authorName, correlationID, description, messageID, timestamp, type, contract, and info, along with their respective types and descriptions.</p>
Type	extension of anre:Message

Complex Type anre:ContractSuspendedByAnre

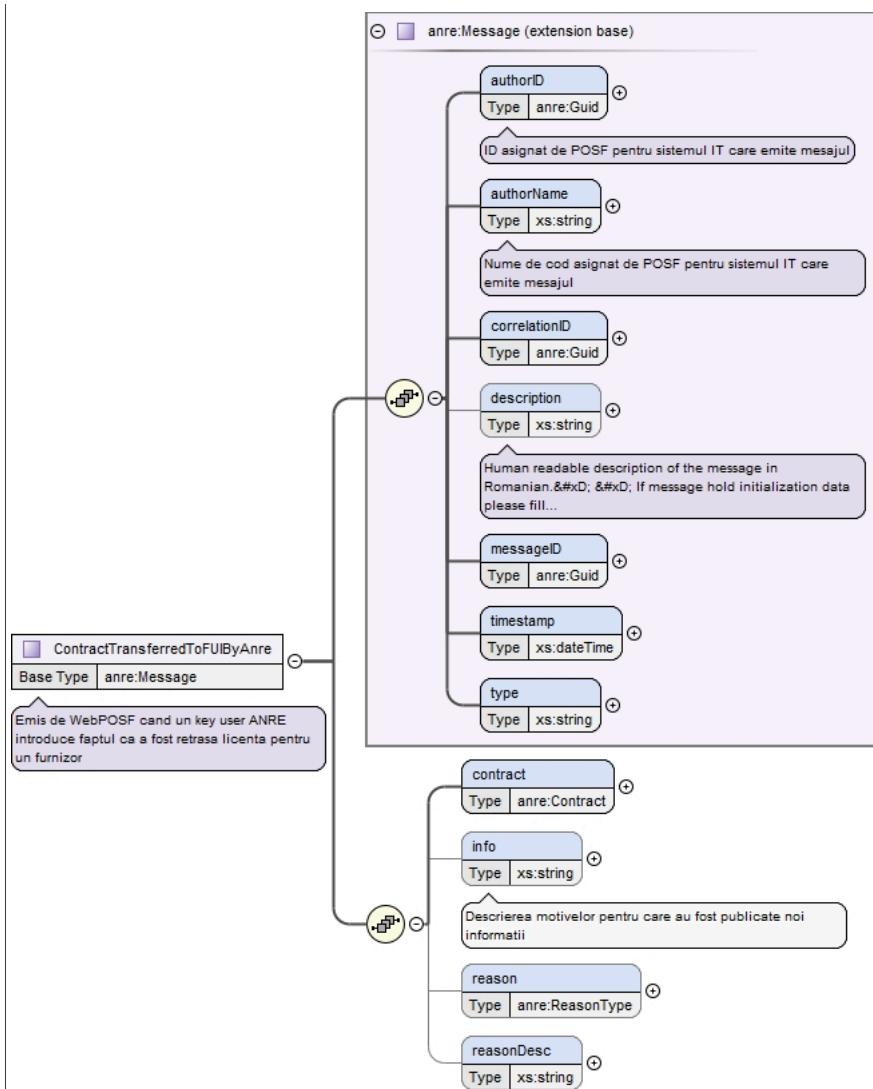

Namespace	http://www.anre.ro/ANRESchema
Annotations	Emis de WebPOSF cand un key user al ANRE introduce faptul ca unui furnizor i s-a suspendat licenta
Diagram	<p>The diagram illustrates the inheritance relationship between the ContractSuspendedByAnre complex type and the anre:Message extension base. The anre:Message base type is shown with its various fields: authorID (anre:Guid), authorName (xs:string), correlationID (anre:Guid), description (xs:string), messageID (anre:Guid), timestamp (xs:dateTime), and type (xs:string). Below it, the ContractSuspendedByAnre type is defined as an extension of anre:Message. It adds four new fields: contract (anre:Contract), info (xs:string), reason (anre:ReasonType), and reasonDesc (xs:string). Annotations for both types provide context: the base type's annotation states it's emitted by a key user of ANRE, while the derived type's annotation specifies it's emitted by WebPOSF.</p>
