Complex Type anre:ContractActivatedByANRE

Namespace	http://www.anre.ro/ANRESchema
Annotations	Emis de WebPOSF cand un key user al ANRE introduce faptul ca unui furnizor i s-a de-suspendat licenta
Diagram	<p>The diagram illustrates the inheritance relationship between the ContractActivatedByANRE complex type and the anre:Message extension base. The ContractActivatedByANRE type is defined as an extension of anre:Message. Both types share common fields such as authorID, authorName, correlationID, description, messageID, timestamp, and type. The ContractActivatedByANRE type also includes a specific field, contract, which is of type anre:Contract. Annotations for both types provide context about their usage: anre:Message is used for emitting messages by the POSF system, while ContractActivatedByANRE is used for emitting messages by ANRE users to activate contracts.</p>
